

Tunnel escalator ETK -245

Intended for people moving inside deep built underground stations with big passenger flows.

Technical characteristics	
Elevation height, m	15,1- 45
Elevation angle	30°
Main drive speed, not more, m/sec	0,75
Auxiliary drive speed, not more, m/sec	0,04
Staircase decking width, mm	1 003
Vertical dimensions between decking of adjacent stairs of escalator's inclined part, mm	200
Depth of stair, mm	403
Pitch of stair decking, mm	10
Main drive power, kW	160
Auxiliary drive power, kW	7,5
Distance between axis of running handles, mm	1 360
Distance between axis of draught chains, mm	1 240
Passenger flow capability, not more person/ hour	8 910
Sound volume above staircase, dBa	80
