

Roller containers

ROLLER (Roller -of) CONTAINERS

Multifunctional containers intended for: collecting and storage of different bulk of loose cargoes loading/unloading and transportation by a truck equipped with special hydraulic or wire rope devices. Containers are manufactured on the basis of DIN standards and in conformity with requirements of the Euro standard for environment protection. Containers are to be protected from corrosion by priming in colors required by a customer. In case of necessity, they are to be equipped with tarpaulin hooks, pendulum doors, roof sliding on rollers, brackets and clamps for wire rope loading. The dimensions are to be changed under the customer is requirements.
